Cyberabad Moves: Reimagining Mobility

Cyberabad Moves is a three-day exhibition and convening focused on reimagining public transport as the backbone of a safe, inclusive, climate-resilient and globally competitive Cyberabad. The platform brings together government agencies, practitioners, academic institutions, civil society, students and citizens to reflect on the city's mobility journey and chart a shared way forward.

School Students Innovation Challenge

Cyberabad is among the fastest growing cities in the world, attracting global talent and competition. As it prepares for long-term urban growth, the city is now faced with significant mobility challenges due to an influx of private vehicles and a lack of commensurate growth in public transport infrastructure.

How we move in our city shapes how we live, learn, and play. Mobility enables people to access opportunities and excel in their chosen field. **The Cyberabad Moves School Student Innovation Challenge** invites school students to imagine and design a better future for their daily journeys to school, parks, tuitions, markets, and bus stops. This challenge is part of the Cyberabad Moves Exhibition 2026, and gives young minds a platform to show how they see the future of their city.

Cyberabad Moves Event Details:

- **Dates**: 26th - 28th November, 2026
- **Venue**: T-Hub, Raidurgam
- **Time**: 9:00am to 6:00pm
- **Organized by**: Cyberabad Municipal Corporation, Cyberabad Police, Society for Cyberabad Security Council, in partnership with SHIFT Transport coalition

Who can Participate?

This challenge is open to **school students from recognized schools in Cyberabad.** To ensure fair and age-appropriate evaluation, entries will be judged in the following categories:

- **Category M** (Middle School): Classes 6-8
- **Category S** (Senior School): Classes 9-12

Participation Format

- Team entries of a minimum of 2 and a maximum of 5 students
- One school teacher may be listed as a mentor (optional but encouraged)

Themes (Choose one Theme for your Team)

---

1. **The "Cool" School Commute (My Safe & Green School Zone)**

Design a Safe & Green Zone around your own school. How can students reach school safely using walking, cycling, or public transport instead of private cars?

2. **My Neighbourhood**

Choose your neighborhood and show how children and families can access school, parks, shops, clinics, bus stops or other amenities within a 15-minute walk, cycle, or short bus ride.

3. **Streets For Play: Reclaim Streets for Children**

Pick one street, lane, or junction near your home or school that feels unsafe, noisy, or boring. Reimagine it so you and your friends can play, meet, and move around freely.

4. **Public Transport for future Cyberabad**

Imagine what buses, bus stops, and metro stations should look like in the future so that children, parents, grandparents, and everyone feels safe and happy using them.

5. **Behaviour Change for Safer and Greener Journeys**

Design a campaign or program that changes how people choose to travel and use roads in Cyberabad. Focus on the human side of mobility: sustainable travel choices including carpooling, use of public transport etc. and encouraging safe road user behaviour (helmet and seat belt use, speed discipline, respect for pedestrians etc.)

How to Participate

Students may submit their work in any one of the following formats:

1. **3D Models (Static or simple working models)**

- Using sustainable or recycled materials is preferable (cardboard, clay, scrap, etc.)
- Maximum base size: 3 feet x 2 feet
- Maximum height: 3 feet

2. **Posters/Drawings**

- Hand-made or digital using 3D visualization
- Size: Use either A1 (approx. 841 x 594 mm) or A2 (approx. 594 x 420 mm) sheets

What should the entry clearly show?

Your project should help others understand:

- What problem you are trying to solve
- Your idea or design
- How it makes streets safer and cleaner
- Why it is good for the future Cyberabad

Please Note: Each entry should have written Name, Grade, School Name and Title

Judging Criteria (age-appropriate)

Projects will be judged based on:

- Safety for children and families
- Environmental friendliness
- Creativity, innovation, and imagination
- Connection to real places in Cyberabad
- Clear explanation of ideas

Why Should Students Participate?

- **Exhibit Your Work**: Selected projects will be displayed at the Cyberabad Moves Exhibition for citizens and city leaders.
- **Certificates**: All participants will receive 'Certificates of Innovation'.
- **Learning Experience:** Besides boosting creativity & confidence, students will interact with experts.
- **Recognition:** Outstanding entries will be specially recognized by category.

This challenge supports experiential learning, civic awareness, and project-based education aligned with NEP 2020.

Key Information

Important Dates:
